

Allison E. Kerndt

515-283-3193

AKERNDT@NYEMASTER.COM

DES MOINES OFFICE

Allison Kerndt “goes to school” with each client. “I want to understand the invention, the technology, the industry,” Allison says. “I have always loved figuring out how things work, and I ask a lot of questions.”

As a clerk for the Hon. Randall R. Rader on the U.S. Court of Appeals for the Federal Circuit in Washington, D.C., Allison saw the inner workings of the court that hears all appeals related to [patents](#). “During my clerkship, I worked alongside some of the brightest legal minds in my profession. Every day we were asked to deconstruct complex issues and advance persuasive legal arguments. It was a unique, once-in-a-lifetime opportunity,” Allison says. She is the only Federal Circuit clerk practicing law in Iowa. The experience gained during this prestigious clerkship has served her and her clients well.

Allison began her career in Washington, D.C., at a boutique IP firm and practiced at a large international law firm before returning to her home state of Iowa. Now Allison combines her experience, chemical engineering education, and curiosity to understand her clients’ business needs. “I draw on my engineering education every day,” Allison says. “An engineering curriculum teaches problem solving—developing analytical skills, creating solutions, and embracing outside-the-box ideas.”

Allison partners with clients ranging from start-ups to multinational corporations on issues related to the management of their intellectual property portfolios. Her experience spans a wide range of technical areas, including pharmaceutical, chemical, and cosmetic arts, biomedical devices, electronic devices, and business methods. She is experienced in the preparation and prosecution of patent and trademark applications and registered to practice before the United States Patent and Trademark Office. She also regularly advises clients on issues involving the international protection of their intellectual property assets and has significant IP litigation experience, including appearing before the U.S. International Trade Commission.

“What is most satisfying for me is partnering with my clients to achieve their business goals—and truly understanding their industry in the process. Protecting their intellectual property should be part of a broader business strategy,” she says. In addition to her active legal practice, Allison serves as an adjunct law professor at Drake University Law School.

Creative and tenacious, Allison helps clients’ businesses flourish. She becomes an integral team member—not just her clients’ lawyer.
