DES MOINES OFFICE

An industry veteran, Chad Larson is passionate about staying ahead of or within technology trends based on the organization. Chad has a proven track record of driving innovation, optimizing technology infrastructure, and aligning IT strategies with organizational goals.

At the firm, Chad oversees the implementation of cutting-edge IT solutions that enhance operational efficiency, ensure robust cybersecurity, and support business growth and stability.

With more than three decades of experience in IT leadership, Chad has honed skills in network architecture, capacity planning, and fostering high-performing technical teams. Under Chad's leadership, businesses benefited from strategic IT roadmaps, seamless transitions to advanced systems, and improved data network reliability.

His skills encompass business systems, email, applications, network infrastructure and security, web applications, virtualization servers, and desktops. He has worked on a diverse range of implementations including for corporate, manufacturing, casino, and large venue projects. Chad has led transformations that prioritize scalability, cost-effectiveness, and security. He has served as a senior technical expert, guiding organizations through complex challenges in network design and data continuity.

Chad knows how to build and manage teams to deliver exceptional technical solutions tailored to unique business needs. He has years of experience helping organizations bridge the gap between traditional IT setups and modern cloud or hybrid solutions.
